Every-Day Affordability

Natural gas is more affordable than other major home energy sources.

Heating Value Compared to Other Energy Sources

A piece of equipment with a higher annual fuel utilization efficiency (AFUE) rating provides greater savings for customers. Natural gas furnaces offer the greatest energy savings for customers. A 97 percent AFUE Gas furnace costs only \$453 per year to operate, and even an 80 percent AFUE Gas Furnace costs less to operate than the most efficient propane furnace. Other furnaces, including oil furnaces, electric heat pumps, and electric resistance furnaces cost two to four times as much as the most efficient gas furnaces.
